EVERYTHING IN THE HANDS

Ergonomic workplace systems

A workplace that adapts. To the size, constitution and tasks of the team member. An important factor for the health, motivation and performance of employees. The well thought-out workstation systems from OTTOKIND meet the highest ergonomic standards and ensure optimised workflows. Thanks to the modular design and the diverse expansion options, the highly functional workstations can be adapted to changing requirements and production tasks at any time. The result: less downtime, higher productivity and maximum flexibility.

SHORTENED ASSEMBLY AND GRIPPING PATHS

Compact, perfectly structured workspace layout for more productivity.

HIGH OPERATING COMFORT

Individually adaptable to each employee through height adjustment, flexible swivel arms and variable storage solutions.

ONE-PIECE-FLOW SUITABLE

Couplable workstations for continuous flow production.

FLEXIBLY COMBINABLE

A wide range of equipment variants for different industries and requirements.

EXTREMELY RESILIENT

Robust construction of table and attachments.

FOCUS HUMAN

The most valuable capital of a company

Today, ergonomics at the workplace means much more than a height-adjustable desk and a comfortable chair. It is a holistic approach that focuses on the entire organisation of the workplace (workplace, working environment, tools and aids) and aims at an optimal workflow. Ergonomic workplace concepts adapt individually to the needs of the employees, protect them from damage to their health and support them in working in a motivated and efficient manner.

Ergonomics means a win-win situation - for employees and employers. Both benefit from higher productivity and improved quality, which is also reflected in increased customer satisfaction. In addition, costs are reduced because ergonomic workplaces help to reduce absenteeism due to illness. For companies, satisfied and healthy employees are the most valuable capital: investing in more ergonomics is therefore also an expression of interest and appreciation.

New Work

The world of work is changing rapidly: New Work has become synonymous with innovative approaches to work design - towards modern, flexible forms of work, but also towards new attitudes. The world of work is becoming more responsive to employees and their needs for more freedom and self-realisation. For companies, new work is the way to attract and retain young talent and capable employees and to maintain their own future viability.

Fit and motivated

Young, well-educated workers are redefining the rules of the game: they expect more say, more flexibility in work organisation and a healthy workplace environment that inspires and promotes their creativity and productivity. The answer of future-oriented companies: Time ergonomic workspaces that ensure concentration and an optimal workflow.

Individual workplaces

Whether at the workbench or in the office: musculoskeletal disorders caused by poorly designed working methods and unhealthy working postures should finally be a thing of the past. Modern workplaces must be flexibly tailored to the individual needs of employees. This reduces sick leave and production losses, increases employee satisfaction and has a positive effect on the company's success.

ERGONOMIC 2-IN-1 SOLUTION FOR OPTIMAL WORKFLOW

Best practice: Ernst Markmiller GmbH in Deggendorf

As a wholesaler and retailer, the specialist trading company Ernst Markmiller has specialised in professional solutions for trade and industrial needs. As a „partner of the professionals“, Markmiller has its finger on the pulse of the times and has always consistently geared its corporate policy to the needs of its customers. Customer-oriented services, such as the STIHL Centre with its attached workshop for forestry, garden and electrical products, are an important cornerstone of the company's philosophy.

In February 2020, a new company workshop with six workstations was commissioned at the company's headquarters in Deggendorf. Right from the planning stage, Mathias Pester, Head of the STIHL Centre and Workshop Department, was looking for a future-oriented workplace solution that would provide his employees with the best possible support in their day-to-day work processes. The decision was made in favour of an ergonomic workstation system from OTTOKIND. As a long-standing specialist trade partner for OTTOKIND products, Markmiller appreciates

not only the proven product quality and, above all, OTTOKIND's special consulting expertise. A special feature: for the first time, Markmiller also benefited from the proven know-how of the OTTOKIND ergonomics specialists as an end customer in this project.

Individually tailored to the workshop's premises, the new workstation systems meet all the requirements of modern, fluid workflows: they can be flexibly combined, offer a high level of operating comfort, shortened working times, and are easy to use. Gripping and assembly paths and a robust, resilient construction of tables and attachments.

The central component of each workstation are two electrically height-adjustable work tables, which stand in an L-shape and thus meaningfully connect the areas of VDU work and repair. Stable back walls provide space

for switch boxes, tool suspension and other equipment. The two screens can be conveniently moved to the required viewing height via sturdy swivelling soft-move swivel arms.

With a brightness value of 1,130 lux per luminaire, which is similar to daylight, the installed workplace lighting creates optimal visual conditions both for VDU work and for fine motor work during repairs, thus preventing premature fatigue. „In addition, the LED luminaires have very low glare values and avoid disturbing shadows and glare effects on the work surfaces as far as possible,“ explains Cengiz Akseki, technical consultant and project manager at OTTOKIND.

When Mathias Pester and Cengiz Akseki set up the new workstations in the workshop, they deliberately chose light-coloured surfaces for the tables. For the employees, the light-coloured table surface is not only visually more attractive, it also makes it easier to find small parts such as screws.

At Markmiller, the modern ergonomic workplaces differ considerably from the dingy workshop image of earlier years. What has emerged are contemporary, visually attractive workspaces where, thanks to ergonomically thought-out system solutions, back and neck pain are a thing of the past for employees and motivation, inventiveness and efficiency are promoted.

Ideal combination of screen and repair workstation

3D planning of the future workplace situation

„All colleagues are very happy at their new workshop workplaces and feel fit and efficient. In terms of ergonomics, this is a huge difference from the old workshop.“

Mathias Pester, Department Manager STIHL Center, Markmiller

SHORT & SNAP

Task: Installation of ergonomic workshop workstations in the newly built STIHL Centre.

Procedure: Analysis of the room situation and the process flows, configuration of 6 combination workstations for VDU work and repair.

Solution: Electrically height-adjustable corner work tables from the standard OTTOKIND range, extensive accessories tailored to special needs (storage, cable routing, power/USB connections, lighting).

Special features: Generous space for switch boxes and work equipment due to complete rear panels, double monitor solution with two stable swivel arms.

Result: high employee satisfaction with the workplaces, higher work motivation and decreasing sick leave; thus increasing efficiency and decreasing costs.

THE PERFECT WORKPLACE

Modular design according to your needs

FILING FLOOR

Versatile footprint that is adjustable in depth and inclination. Optimally adaptable to body size and reach distances.

PUNCH-OUT WALL

Flexible fastening option for tools, materials and everything you need in direct access.

HOOK SYSTEMS

Can be easily and securely hooked into the perforated back wall. Numerous holders available for tools, open fronted storage bins, shelves and other work materials.

TABLE PLATE

Robust materials for different areas of application. Made of beech wood, hard laminate, with melamine resin coating or a special ESD laminate.

ACCESSORIES

Extensive equipment components for the different requirements of packing, industrial and assembly workplaces.

ESD ACCESSORIES

Distributors, table coverings, wrist straps, earthing components and mats for mounting electronic components are available.

RAIL

For tool trolleys with up to 30 kg load.

LED LIGHTING

Uniform illumination of the working area for maximum visual comfort. Several lighting lines available for different requirements and applications.

SWIVEL ARM

360° swivelling. Loadable up to 30 kg. Creates additional space for monitor, keyboard or surfaces for material storage.

HEIGHT ADJUSTMENT

For individual adjustment of the workstation to the height of the employee. Mechanical or electrical with digital height display and memory function.

ENERGY AND COMPRESSED AIR SUPPLY

High-quality power and compressed air sockets with safe cable routing. Space-saving and easily accessible.

GRIP ZONES

- 1. Work Centre**
Both hands work in direct view
- 2. Expanded work centre**
Both hands reach all points of this zone
- 3. One-hand zone**
Parts + tools are easy to reach with one hand
- 4. Extended one-hand zone**
Outermost still usable gripping area

MULTI 4 EASY

Description multi4easy

The basis of the ergonomic OTTOKIND multi4easy workstation systems is the stable connection of the table frames made of extremely load-bearing vertical supports and horizontal profile tubes with the load-bearing worktops.

The Height adjustment functions via tube-in-tube constructions. Optionally, a mechanical version with adjustment in a height grid of 20 mm as well as an electric version with infinitely variable adjustability are available.

The dovetail profile tube inserted at the front and rear under the tabletop with its system groove enables the drawers, actuating elements and power supply to be adjusted in steps along the front edge of the tabletop.

At the back, dovetail profile tubes are arranged under the table top and at knee height. Users can freely adjust the vertical table supports horizontally.

The height measurements given apply to the top edge of the table frame, the thickness of the worktops must be added for the total height. The load capacity refers to the basic tables. Worktops, extensions and add-ons reduce the load capacity. ESD conductivity is only given for the light grey colour.

multi4easy in numbers

Table frame:	Bolted tubular frame Table widths: 1280, 1685, 2030 mm
Table depths:	700, 800 and 900 mm
Table feet:	with level compensation
Table frame:	always with rear connection profile for Table extension supports (60 x 30 mm)
Height adjustment :	mechanical, 690 - 990 mm, 20 mm grid electric, 690 - 1070 mm, infinitely variable
Load capacity:	300 kg
Surface:	ESD - conductive powder coating, baked at 180°
Standard colour shade:	acc. to colour concept Lifting columns always light grey conductive

Perforated back panel

Square perforation 10 x 10 mm, hole spacing 38 mm, for tool holders

Universal frame

Here fitted with gripping tray rails and boxes, also for perforated rear walls or shelves.

Gripping tray rail

for plastic crates with hanging edge, versatile use

Swivel arm

360° swivelling, 30 kg load capacity, for shelves, monitor holders, perforated back panels, universal frames

Dovetail profile

Stepless adjustability across the entire table width

Corner connection

strong corner connection for a stable table (multi4easy-mechanical)

multi4easy-M - Configuration examples

Basic starter m4e-M1

- Table frame multi4easy-M, 300 kg load capacity
- Mechanically height-adjustable from 720 - 1020 mm in a height raster of 20 mm
- Table top beech multiplex 30 mm thick, oiled surface,
- Lacquer finish as shown Light grey (conductive)

Width mm	Depth mm	Height mm	No.
1280	800	720-1020	523620

Basic starter with m4e-M2 superstructure

- Table frame multi4easy, as described for Basic starter m4e-M1
- Table top beech - multiplex, 30 mm, surface oiled
- Table structure 2-part, (2 columns, without cantilever, 1850 mm high)
- 2 square hole - back panels W x H: 1000 x 380 mm
- 2 slatted shelves WxD: 1000 x 321 mm
- Lacquer finish as shown Light grey (conductive)/Enzian blue

Width mm	Depth mm	Height mm	No.
1280	800	720-1020	523630

Packing workstation I m4e-M3

- Table frame multi4easy, as described for Basic starter m4e-M1
- Table top melamine resin - coated, 28 mm, grey
- Table structure 3-part, (3 columns, without cantilever)
- 2 square hole - back panels W x H: 1000 x 380 mm
- 2 square hole - back panels W x H: 655 x 380 mm
- 2 slatted shelves WxD: 1000 x 321 mm
- 1 slatted shelf WxD: 655 x 321 mm (front)
- 1 slatted shelf WxD: 655 x 214 mm (rear)
- 1 Filler plate WxD: 655 x 130 mm
- 5 sheet metal separating supports DxH: 535 x 400 mm
- Lacquer finish as shown Light grey (conductive)/Enzian blue

Width mm	Depth mm	Height mm	No.
1685	800	720-1020	523640

Complete tables are also available pre-assembled on request. Detailed descriptions with the respective articles on the following pages.

multi4easy-E - Configuration examples

Basic starter m4e-E1

- Table frame multi4easy-E, 300 kg load capacity
- electrically height adjustable from 720-1100 mm
- Memory hand switch (4 table heights, digital display)
- Table top beech - multiplex 30 mm, surface oiled,
- Lacquering as shown light grey (conductive)

Width mm	Depth mm	Height mm	No.
1685	800	720-1100	523650

Assembly workstation

- Table frame multi4easy, as described for Basic starter m4e-E1
- Table top beech - multiplex 30 mm, surface oiled,
- Basic structure 3-part (3 columns)
- 2 square hole back panel WxH: 1000 x 380 mm
- 2 slatted shelves WxD: 1000 x 321 mm,
- 1 swivelling monitor holder
- Painting as shown light grey (conductive)/enzian blue

Width mm	Depth mm	Height mm	No.
2030	800	720-1100	523660

Packing workstation II

- Table frame multi4easy, as described for Basic starter m4e-E1
- Table top beech - multiplex 30 mm, surface oiled
- 2 side panels
- Basic structure 3-part (3 columns)
- 2 square hole back panel WxH: 1000 x 380 mm
- 1 slatted shelf WxD: 1000 x 321 mm
- 1 slatted shelf WxD: 1000 x 214 mm
- 7 sheet metal separating supports DxH: 535 x 400 mm
- 1 Filler plate WxD: 1000 x 130 mm
- 1 screen swivel arm with keyboard/mouse holder
- 1 gripping tray rail 1000 mm
- 1 drawer unit with 2 drawers (100 + 150 mm high)
- 1 cup holder
- 1 PC holder
- Painting as shown light grey (conductive)/enzian blue

Width mm	Depth mm	Height mm	No.
2030	800	720-1100	523670

multi4easy-M - with mechanical height adjustment

Description multi4easy-M

The basis of the ergonomic OTTOKIND multi4easy-M workstation systems is the stable connection of the table frames made of extremely load-bearing vertical supports made of square tube profiles and horizontal profile tubes with the load-bearing worktops.

The height is adjusted via a tube-in-tube construction. The table height can be adjusted in a height range of 20 mm from 690 to 990 mm to suit the user and the work requirements.

The swallowtail profile tube with integrated guide groove inserted under the tabletop at the front and rear enables the continuous adjustability of drawers, operating elements and power supply along the front edge of the tabletop with its system groove.

At the back, dovetail profile tubes are arranged under the table top and at knee height. Users can freely adjust the vertical table top supports horizontally.

multi4easy-E - with electric height adjustment

Description multi4easy-E

The OTTOKIND multi4easy-E workstation system is based on the stable composite of high-quality linear guides, bolted to the horizontal profile tubes and the worktops.

The Height adjustment functions via integrated, electrically driven lifting columns. The table height can be continuously adjusted to the user and the work requirements in the range from 690 to 1070 mm.

Dovetail profile tubes with integrated guide groove enable grid-free adjustability of system components in horizontal direction.

The dovetail profile tubes inserted at the front and rear under the tabletop with its system groove enable the continuous adjustability of drawers, actuating elements and power supply along the front edge of the tabletop.

At the back, dovetail profile tubes are arranged under the tabletop and at knee height. Users can freely adjust the vertical table supports horizontally.

Table extension supports for the multi4easy systems

- Table top supports for individual and flexible use of the area above the working level (profile 60x30 mm)
- offer clearly arranged space for tools or assembly materials
- Made of sturdy rectangular tube profile with four-sided system perforation in height grid 42 mm
- Can be freely positioned horizontally in dovetail profiles
- Version with 2 or 3 uprights, suitable for body widths 655, 1000 and 1250 mm according to table width and module widths
- for swivel arm elements, square hole back panels, storage arches or gripping tray rails
- With 670 mm extension arm for optimum lighting and ergonomic storage of tools on runners above the table surface
- Table superstructures move together with the table tops in height
- Smooth material supply from the rear via shelves
- Options for equipment with power and compressed air supply and without boom
- Load capacity 100 kg

MULTI 2 MOVE

Description multizmove

The multizmove series has quiet-running, powerful drives that enable infinitely variable height changes. It is characterised by the fact that extensive accessories can be attached for individual use.

The table system can be used wherever the goods to be processed require an individual table height for the employee. The range of accessories includes all the necessary aids for setting up a structured and clear workstation.

With their modern and timeless design, the tables are not only used in the workplace, but can also be conveniently used in the administrative area. The workstations can easily accommodate loads of up to 200 kg and can also be linked together via angles or rows by means of an add-on table.

multizmove in numbers

Table frame:	welded tubular frame
Table widths:	1280, 1685, 2030 mm
Table depths:	700, 800, 900, 1000 mm
Feet:	with levelling height adjustment : electric, 700 - 1070 mm
Lifting speed:	20 mm/s
Load capacity:	200 kg for basic table 100 kg for extension table
Optional:	Available with table linking 90° and 180° with synchronous operation
Table structure:	up to max. 380 mm height
Colour:	Light grey conductive, similar to RAL 7035

The height measurements given apply to the top edge of the table frame, the thickness of the worktops must be added for the total height. The load capacity refers to the basic tables. Worktops, extensions and add-ons reduce the load capacity.

Perforated back panel

Square perforation 10 x 10 mm, hole spacing 38 mm, for tool holders

Universal frame

Here fitted with gripping tray rails and boxes, also for perforated rear walls or shelves.

Gripping tray rail

for plastic crates with hanging edge, versatile use

Swivel arm

360° swivelling, 30 kg load capacity, for shelves, monitor holders, perforated back panels, universal frames

Height adjustment

electrical version infinitely variable from 700 - 1070 mm

Table base

Lifting column centrally positioned. Foot in low overall height and encapsulated design, without crushing hazards.

multimove – Components

- Individually configurable
- electrically height adjustable from 700 to 1070 mm
- Table frame with holders for swivel arm and clip-on elements
- Table feet with skid profile closed on all sides and levelling feet
- Table frame: always with ESD conductive powder coating and baked at 180°.
- Lifting columns always light grey conductive

Table frames

Table frame 2E, electrically height-adjustable v. 700 - 1070 mm

- Height infinitely variable,
- incl. mountings for swivel arm and
- Pin-on elements
- GT- Basic table with 2 height-adjustable table legs, 200 kg load capacity
- AT add-on table with 1 height-adjustable table leg, loadable with 100 kg belastbar

Other panel designs and thicknesses are available on request.

Table extension supports multizmove

Everything at your fingertips

The table extension sets of the ergonomic workstation system multi-2move open up the possibility of using the area above the working level individually and flexibly.

Above the table surface, there is space for tools or assembly materials - always within reach and clearly arranged. The vertical supports made of sturdy rectangular tubes can be positioned in the grid of the body widths.

The number of supports depends on the table width and the desired module width.

The uprights have a 4-fold system perforation in a 42 mm grid. Perforated back panels, shelves or gripping tray rails with widths of 655, 1000 and 1250 mm can be hooked in without any problems. The table superstructures move in height together with the table tops!

Table extension set multizmove

- Mounting on the back of the table frame
- Set with cross tubes and supports
- Set with 2 supports for 1 superstructure bay
- Set with 3 supports for 2 superstructure bays
- Order square hole back panels

MULTI 4 MOTION

Description multi4motion

Complex assembly tasks often require the use of many individual parts and work aids. Not least in terms of time economy, these components are precisely positioned by the multi- system's modular system - adjustable in a flash and without tools and thus individually adaptable to the user.

Range of application

When loading the table with add-on elements, the access frequency and the sequence of the material in stock play a decisive role. Efficient and homogeneous workflows are the objective here.

Correctly placed attachments counteract one-sided loads and thus protect the musculoskeletal system.

Smooth and ergonomic workflows are guaranteed.

Table frame

The basis of the ergonomic OTTOKIND workstation systems multi4motion are the stable, welded table frames under the worktops and the extremely load-bearing lifting column profiles. Rear-mounted table attachments, side attachments and swivel arm elements on the table top are the main options. Hanging drawers and cabinets, as well as the holder for PCs, find connection points on the table frame or can be attached to the side panel.

Lifting column profiles

Stable lifting columns made of torsion-free, rectangular steel profiles in conjunction with the tubular steel frame welded all round give the table systems a high degree of stability and, with the appropriate configuration, allow a load capacity of up to 300 kg.

The centrally arranged lifting columns and the low foot profiles provide maximum legroom. Solid connections to the table frame ensure absolute stability, even with maximum loads and wide table configurations.

Connection options for power and compressed air are a matter of course and can be installed via plug-in components.

multi4motion in numbers

Table frame:	welded tubular frame Table widths: 1030, 1280, 1685, 2030 mm
Table depths:	700, 800, 900, 1000 mm
Feet:	with levelling Height adjustment: electric, 700 - 1170 mm
Lifting speed:	20 mm/s
Load capacity:	300 kg with beech multiplex top, 200 kg for panels with ESD, hard laminate, melamine resin coating, 200 kg with special lifting column set for adjustability from 700-1170 mm
Optional:	Available with table linking 90° and 180° with synchronous operation
Table superstructures:	up to 875/1250 mm height Profile 60x 30 mm
Colour:	Light grey conductive, similar to RAL 7035

The height measurements given apply to the top edge of the table frame, the thickness of the worktops must be added for the total height. The load capacity refers to the basic tables. Worktops, extensions and add-ons reduce the load capacity.

Perforated back panel

Square perforation 10 x 10 mm, hole spacing 38 mm, for tool holders

Table set-ups

Table extension supports can be used on all sides, height grid 42 mm

Cantilever frame

With superstructure for workstation light and running rail, compressed air and power supply possible

Swivel arm

360° swivelling, 30 kg load capacity, for shelves, monitor holders, perforated back panels, universal frames

Slatted floor

3 widths, 5 depths, incl. pair of supports, inclinable, can be finished with front stop bar

Height adjustment

Height adjustment with digital height display and memory function

Side panel

with square perforation for standard tool holders

Table foot with linear guide

Recessed table base for more ergonomics at the workstation, low overall height, feet encapsulated, no pinch points, with level compensation, electrically height-adjustable, load capacity up to 300 kg

multi4motion - Configuration examples

Basic starter

- Table frame multi4motion, base table 300 kg load capacity
- electrically height adjustable from 730 - 1100 mm
- Memory hand switch (4 table heights, digital display)
- incl. foot side panels with square perforation
- Hard laminate panel 30 mm, decor light grey
- Lacquer finish as shown Light grey (conductive)/Enzian blue
- Lifting columns always light grey (conductive)

Width mm	Depth mm	Height mm	No.
1280	700	730-1100	584900

Basic starter with superstructure

- Table frame multi4motion, as described for Basic starter
- Hard laminate panel 30 mm, decor light grey
- Basic structure 2-part (2 columns, without outriggers)
- 2 square hole back panels WxH: 1250 x 380 mm
- Lacquer finish as shown Light grey (conductive)/Enzian blue
- Lifting columns always light grey (conductive)

Width mm	Depth mm	Height mm	No.
1280	700	730-1100	584920

Packing workstation I

- Table frame multi4motion, as described for Basic starter
- Wall drawer left, WxDxH: 432 x 432 x 100 mm
- Multiplex board 30 mm, surface oiled
- Basic structure 3-part (3 columns, without outriggers)
- 1 square hole back panel WxH: 1000 x 380 mm
- 2 square hole back panels WxH: 655 x 380 mm
- 2 slatted shelves WxD: 1000 x 321/214 mm, incl. filler panel
- 5 sheet metal separating supports DxH: 535 x 400 mm
- 1 slatted shelf WxD: 655 x 321 mm
- 1 slatted shelf WxD: 655 x 214 mm, incl. stop rail
- 3 socket strips 3-fold, incl. 1 set of connection cables
- without decorative items (cardboard, A4 folders, display storage containers etc.)
- Lacquer finish as shown Light grey (conductive)/Enzian blue
- Lifting columns always light grey (conductive)

Width mm	Depth mm	Height mm	No.
1685	900	730-1100	584940

ESD workstation

- Table frame multi4motion, as described for Basic starter
- ESD laminate worktop 30 mm, light grey decor
- Viewing panel H: 250 mm
- Footrest continuous, step surface WxD: 500 x 350 mm
- Basic structure 2-part (2 columns, incl. outrigger)
- LED task luminaire basic-line, L: 1250 mm
- 1 shelf WxD: 615 x 410 mm, depth and inclination adjustable
- 2 gripping tray rails W: 655 mm
- 1 TFT holder for gripping tray rail (VESA 75/75 or 100/100)
- 1 set of ESD accessories (distributor, earthing module, wrist strap)
- 1 swivel arm, type o1, for mounting in the table frame
- 1 swivel arm type o2, mounting in the table frame
- WITHOUT decorative items (display storage containers, Euro containers etc.)
- Painting as shown light grey (conductive)/ gentian blue (conductive), lifting columns always light grey (conductive)

Width mm	Depth mm	Height mm	No.
1280	700	730-1100	584950

Assembly workstation

- Table frame multi4motion, as described for Basic starter
- Hard laminate panel 30 mm, decor light grey
- Basic structure 3-part (3 columns, incl. outrigger)
- LED task luminaire basic-line, L: 1000/655 mm
- 1 square hole back panel WxH: 1000 x 380 mm
- 2 slatted shelves WxD: 1000 x 321/214 mm, incl. filler panel
- 2 shelves WxD: 615 x 410 mm, depth and inclination adjustable
- 2 socket strips 3-fold, incl. 1 set of connection cables
- WITHOUT decorative items (Euro containers etc.)
- Lacquer finish as shown Light grey (conductive)/Enzian blue
- Lifting columns always light grey (conductive)

Width mm	Depth mm	Height mm	No.
1685	700	730-1100	584960

Packing workstation II

- Table frame multi4motion, as described for Basic starter
- Multiplex board 30 mm, surface oiled
- Wall cabinet with 3 drawers, WxDxH: 432 x 432 x 445 mm
- PC holder right
- Basic structure 3-part (3 columns, incl. outrigger)
- LED task luminaire basic-line, L: 1000/1000 mm
- 2 square hole back panels WxH: 1000 x 380 mm
- 2 slatted shelves WxD: 1000 x 321/214 mm, incl. filler panel
- 5 sheet metal separating supports DxH: 535 x 400 mm
- 1 slatted shelf WxD: 1000 x 214 mm, incl. stop rail
- 1 TFT swivel arm with keyboard/mouse holder
- 1 holder for roll max. WxØ 500 x 200 mm, incl. tear-off device
- 2 document pockets A4 Countryside, 2 holders for tape dispenser
- 2 hooks and carrying bar for stocking adhesive tape rolls
- 1 bottle holder for 2 bottles
- WITHOUT decorative items (cardboard box, TFT, display storage container etc.)
- Lacquer finish as shown Light grey (conductive)/Enzian blue
- Width mm Depth mm Height mm No.

Width mm	Depth mm	Height mm	No.
2030	800	730-1100	584970

multi4motion - Components

- Individually configurable
- Several tables can be linked in a row or at a 90° angle, height adjustable via a switch
- electrically height-adjustable from 700 to 1070 mm, 300 kg load capacity
- Table frame with holders for swivel arm and clip-on elements
- Table feet with skid profile closed on all sides and levelling feet
- Table frame: always with ESD conductive powder coating and baked at 180°.
- Lifting columns always light grey conductive

Table frames multi4motion

Table frame 4E, electrically height-adjustable v. 700 - 1070 mm

- Height infinitely variable,
- incl. mountings for swivel arm a. Pin-on elements
- GT base table with 4 height-adjustable lifting columns, 300 kg load capacity
- AT add-on table with 2 height-adjustable lifting columns, 150 kg load capacity

Optional Solidur surfaces provide highly wear-resistant protection for the panels.

Table superstructures for multi4motion

Everything at your fingertips

The table superstructures for the ergonomic multi4motion and multi4power workstation systems open up the possibility of using the area above the working level individually and flexibly.

Above the table surface, there is space for tools or assembly materials - always within reach and clearly arranged. With both table systems, horizontal adapter profiles can be mounted on the back of the table frame. The vertical supports made of sturdy rectangular tube can be positioned in the adapter profile for the corresponding module widths.

The possible number of supports depends on the table width and the desired module width.

The uprights have a 4-sided system perforation with a height grid of 42 mm. Square-hole back panels, shelves or grab rails with widths of 655, 1000 and 1250 mm can be hooked in without any problems. The table superstructures move in height together with the table tops!

Flexibility from the start

Material supply from the rear of the table is also easy to realise! By simply hooking in, for example, storage shelves or gripper tray rails, a frictionless material supply is ensured.

Module width 655 mm:

Matched to 2 x Eurobox width: 300 mm ideal use of add-on elements, optimum use of gripping spaces

Module width 1000 mm:

Coordinated with 3 x Eurobox width: 300 mm higher storage capacity on gripping tray rails, shelves and perforated rear walls

Module width 1250 mm:

matched to 4 x Eurobox width :300 mm max. storage capacity on gripping tray rails, shelves and perforated rear walls

Table superstructures - components

- Table superstructures for add-on parts in module widths 655, 1000 and 1250 mm
- Horizontal connecting struts for fastening to the tables
- with system perforation for module widths 655, 1000 and 1250 mm
- Vertical support profiles made of sturdy rectangular tube 60 x 30 mm with system perforation in height grid 42 mm for attaching accessories
- With cantilever frame and cantilever tubes for mounting lights, tool rails above the table surface
- For optimum lighting and ergonomic presentation of tools on runners
- Integratable power and compressed air supply in the uprights
- Load capacity 100 kg

Table superstructures multi4motion

MULTI 4 POWER - THE HEAVY DUTY TABLE

If it needs to be a little more stable - up to 2000 kg load capacity

Height-adjustable work tables with system

In the context of ergonomic requirements, the demands on modern workplaces in the company are also growing. Especially in the area of large and heavy workpieces, setting the optimum height for machining is an absolute must. Only with these settings can the required activities be carried out conscientiously with the greatest use of force and great endurance.

The OTTOKIND heavy-duty tables multi4power offer an electric height adjustment in the range of 710 - 1080 mm (top edge of the table top) for efficient and flexible work processes at an ergonomic working height. They ensure work that is easy on the back and joints. OTTOKIND heavy-duty tables multi4power with 2000 kg load capacity offer additional shelves below the work surface for tools.

The design with spindle motors ensures a high level of safety at the workplace without the risk of crushing. multi4power work tables are dimensionally matched to the rear superstructures of the multi4motion series and allow for the use of the proven options for tool provision, lighting and material flow.

Colour:	Light grey RAL 7035
Dimensions	WxDxH: 1685 x 800 x 710-1080 mm WxDxH: 2030 x 800 x 710-1080 mm

electrical height adjustment
stepless from 710 - 1080 mm

The control panel of the infinitely variable height adjustment is easy to operate at the touch of a button. The display shows the set height to the nearest centimetre.

Desktop version with 1000 kg load capacity

Compressed air connection

Integratable 2-fold compressed air connection

Side panel

with square perforation for standard tool holders

Steel cover

Hot-dip galvanized steel cover, 5 or 10 mm thick

Table top

Robust, 50 mm thick multi-ply board made of beech wood, oiled surface

Height adjustment

Height adjustment with digital height display and memory function

TTable foot with linear guide

High-quality linear guides for electric height adjustment

Workbench version with 2000 kg load capacity

multi4power - Heavy duty

- Fully welded tubular steel frame with screwed-in stabilising plates
- Height adjustment via 4 electric motors, coupled via electronic control, stroke 370 mm, controlled via memory switch
- Load capacity 1000 or 2000 kg, with evenly distributed load
- Self-locking spindles and spur gears reliably prevent unintentional lowering of the table in case of power failure
- Ends with cover, with square perforation 10 x 10 mm, grid spacing 38 mm, for tool holders
- Table top protrudes 80 mm on each long side and 62 mm on each short side compared to the substructure.
- Square base plates, 140 x 140 mm with holes for dowelling to the floor
- Powder-coated surface, RAL7035 light grey
- Worktop beech multiplex, 50 mm thick, oiled surface
- Electrical connected load: 230 V/720 W
- incl. emergency stop switch
- BG-approved conformity with the Machinery Directive 2006/42/EC Annex II, 1.A, for the 2030 mm wide table

multi4power - Desktop - 1000 kg load capacity

- electrically height adjustable
- Beech multiplex board
- 50 mm thick
- Surface oiled

Width mm	Depth mm	Height mm	No.
1685	800	710-1080	581480
2030	800	710-1080	581490

multi4power - Workbench - 2000 kg load capacity

- electrically height adjustable
- Beech multiplex board
- 50 mm thick
- Surface oiled
- Shelf 640 mm deep, 100 kg load capacity
- 3 sockets CEE 7/4

Width mm	Depth mm	Height mm	No.
1685	800	710-1080	581060
2030	800	710-1080	581070
2030	1000	710-1080	581420

multi4power - galvanised steel cover f. worktop

- hot-galvanised steel
- 5 or 10 mm thick
- Screwing to the multiplex board

Width mm	Depth mm	Height mm	No.
1685	800	5	581200
2030	800	5	581210
1685	800	10	581220
2030	800	10	581230

Compressed air connection 2-fold for multi4power

- Factory installation in left-hand vertical stiffening plate
- One-hand quick coupling NW 7,2
- incl. 3 m connection hose

No.
572710

The load capacities refer to the basic tables. Worktops, extensions and add-ons reduce the load capacity.

Table set-ups - multi4power

- Table superstructures for attachments in module widths 655, 1000 and 1250 mm
- Horizontal connecting struts for fastening to the tables
- with system perforation for module widths 655, 1000 and 1250 mm
- Vertical support profiles with 42 mm height grid for attaching system accessories
- With cantilever frame and cantilever tubes for mounting lights, tool rails above the table surface
- For optimum lighting and ergonomic presentation of tools on runners
- Integratable power and compressed air supply in the uprights
- Load capacity 100 kg

Table superstructures for basic tables, incl. cantilever frames and cantilever tubes

Luminaire holder in table width on page 52

MULTI 4 LIFT - LIFTING TABLE WITH LIFTING/LOWERING UNIT

- Table with ball transfer rollers can be used in conjunction with roller conveyors for easy processing of products
- Roller spacing in depth direction approx. 136 mm
- Roller spacing in width direction:
for table width 1080 mm: 104 mm
for table width 1280 mm: 115 or 149.5 mm
- Ball diameter 15 mm
- Bar spacing 135 mm
- Retractable crossbars incl. foam rubber covering
- Workpiece carriers or containers can be positioned, rotated and locked over the entire table surface
- Load capacity 100 kg
- Stroke by means of compressed air (5-8 bar required) and front lever
- incl. front/rear stop, as well as right or left (please specify position)
- incl. side panels with square perforation
- Colour: Light grey conductive, similar to RAL 7035
- Lifting columns always light grey conductive

Table frames - multi4lift

Lifting table multi4lift with ball castors

- electrically height adjustable from 800 - 1170 mm
- Execution as described on previous page

ESD - Components

ESD cap and ESD distributor

- ESD cap with 2 push-button connections 10 mm for the front right cover cap (e.g. for wrist strap), incl. connection cable with push-button led out to the rear in the side table spar
- ESD distributor with 5 push-button connections 10 mm and one main earthing outlet incl. fixing plate (mounting on table frame right rear)

	No.
ESD - cap	500015
ESD - Distributor	559830

ESD wrist strap

- Antiallergenic, elastic band
- adjustable, with spiral cable 2.4 m
- Connection via push button 10 mm
- DIN EN 61340-5-1
- incl. safety resistor

	No.
	E572850

ESD floor mat

- two-layer composite decking
- Leakage resistance according to DIN EN 61340-5-1
- incl. 2 x 10 mm push-button connection
- and 3.0 m earthing cable
- Colour: Platinum grey

Width mm	1500	1800	2100
Depth mm			
1200	554810	554811	554812

5ZESD	105	164	75	643453
6ZESD	102	89	50	643454

- Optimum protection for components at risk of ESD due to controlled discharge
- All our work tables are equipped with ESD-suitable surface coating. For the complete protection of hazardous components, the equipment with further accessories (ESD-suitable worktop and ESD components) is required.
- Standard colour: Light grey conductive, similar to RAL 7035

Table covering ESD

- volume-conductive, two-layered Composite decking made of wear-resistant synthetic rubber
- with push button
- Solder resistant, 2 mm thick
- Colour: Platinum grey
- Farbe: Platingrau

Aluminium runners for tools

- Aluminium runners type N are a modular system for tool transport up to 30 kg
- the special design of the profiles, together with the running gear, results in unsurpassed smooth running in this load range
- Modular design for easy modification and addition
- Low noise pollution due to optimum combination of materials

Running rail N40

- max. load capacity 15 kg
- with tool trolley and 2 end caps
- incl. fixing material

Width mm	Depth mm	Height mm	No.
1030	40	40	576500
1280	40	40	576510
1685	40	40	576520
2030	40	40	576530

Running rail N60

- max. load capacity 30 kg
- with tool trolley and 2 end caps
- incl. fixing material

2030	40	60	576570

Additional tool trolley for aluminium runners

- Robust and smooth running
- jam-free running
- quiet running
- Very low breakaway forces
- with rubber end stop

No.
576590

LED - WORKPLACE LUMINAIRES

Work and vision are inextricably linked in most professions. In addition to good general lighting, it should be noted that several and different visual tasks frequently occur at workplaces in industry. Special attention must therefore be paid to lighting at the workplace, as a large part of the daily sensory impressions are perceived through vision.

Increasing demands on visual tasks and performance require optimised adaptation of illuminance, light colour and glare control, taking into account the specifications of workplace guideline DIN 'EN 12464-1.

In this way, you can effectively counteract impairments of the organism such as discomfort, headaches and other illnesses. By using different light guidance systems, we can offer you exactly the specific solution that your visual task requires.

APL-I A basic-line

APL-I A eco-line

APL-I A basic-line

Thanks to its high-quality LED lighting technology with its microprismatic lens, the basic-line series provides very homogeneous illumination of general control and assembly workstations.

Developed for work in accordance with the Workplace Ordinance.

With a UGR value (glare value) of less than 22, this system luminaire provides significantly better visual comfort for the user and is particularly suitable for checking reflective surfaces.

The basic-line series is optionally available as a dimmable luminaire.

APL-I A eco-line

The eco-line series uses state-of-the-art LED technology in combination with a highly specular coated parabolic louvre to specifically support permanent control colours in accordance with workplace regulations.

Due to the achieved UGR value (glare value) of less than 19, this system luminaire strongly limits glare of the user and permanently supports visual performance.

The eco-line series is optionally available as a dimmable version.

Included in delivery:

- Aluminium housing
- colourless anodised, ESD conductive

- Through-wiring
- integrated ON/OFF switch

- Fastening set
- **Please order connection cable separately**

Task luminaire with microprismatic lens

- LED workplace luminaire
- Glare value UGR < 22
- Device connector plug WieCountry GST 1813
- RA > 80 Colour rendering index
- 50,000 h Lifetime
- 5000 Kelvin
- including luminaire holder for cantilever frames and tubes, suitable for body widths 655, 1000, 1250 mm
- **Order connection cable separately**

APL-I A 600 basic-line eco

- Length: 631 mm, for body width 655 mm, as add-on variant
- 19 Watt system power
- 1850 lm Luminous flux
- 832 lx. average illuminance
- with lamp holders, suitable for table top width 655 mm

Version	Width mm	Depth mm	Height mm	NO.
basic line eco	631	135	57	576700

APL-I A 900 basic-line eco

- Length: 899 mm, for body width 1000 mm, as add-on variant
- 28,5 Watt system power
- 2774 lm Luminous flux
- 1248 lx. average illuminance
- with lamp holders, suitable for table width 1000 mm

Version	Width mm	Depth mm	Height mm	No.

Tool holder assortments for square holes

Tool holder assortment 10 pcs.

- 7 Tool holder with inclined End
- 2 double tool holders
- 1 Tool clamp

No.
579106

Tool holder assortment 12 pcs.

- 4 Tool holder with vertical end
- 3 Double tool holder
- 1 pliers holder
- 1 Machine holder
- 3 Tool holder with slanted end

No.
579108

Tool holder assortment 15 pcs.

- 4 Tool holder with vertical end
- 3 Double tool holder
- 1 pliers holder
- 1 Machine holder
- 3 Tool holder with slanted end
- 1 Wrench holder
- 1 Machine holder

No.
579110

Tool holder assortment 18 pcs.

- 5 Tool holder with slanted end
- 2 Tool holder with vertical end
- 3 Double tool holder
- 3 tool clamps
- 2 pliers holder
- 1 Drill holder
- 1 Wrench holder
- 1 Screwdriver holder

No.
579116

Tool holder assortment 28 pcs.

- 6 Tool holder with slanted end
- 8 Tool holder with vertical end
- 6 Double tool holder
- 2 pliers holder
- 1 Machine holder
- 1 Wrench holder
- 1 Screwdriver holder
- 1 Drill holder
- 2 Saw holder

No.
579112

Tool holder assortment 40 pcs.

- 9 Tool holder with slanted end
- 12 Tool holder with vertical end
- 9 Double tool holder
- 3 pliers holder
- 2 Machine holder
- 1 Wrench holder
- 1 Screwdriver holder
- 1 Drill holder
- 2 Saw holder

No.
579114

Wall cabinet model 10

- Rear panel and inner door sides with system perforation
- Surface:
- Completely light grey RAL 7035
- or carcass light grey RAL 7035
- and doors gentian blue RAL 5010

Width mm	Depth mm	Height mm	No.

TRANSPORT AND SUPPLY TROLLEY

Flexible material supply in individual storage containers or as a Kanban system as well as material supply around the workplace.

Many of these requirements can be met with the modular feed system. Transport and staging trolleys in various widths, depths and heights, which can be equipped with a wide range of feed systems without the need for tools. Lockable castors ensure stability.

Accessories such as shelves, slatted shelves, walk-through shelves and support rails for open fronted storage containers round off the range. The equipment elements can be adjusted as required in a height grid of 42 mm.

Slatted shelves

Transport trolleys with slatted shelves can be loaded from both sides. The flexible slat system allows shelves of different depths. The inclination of the slatted shelves can be adjusted.

Slatted shelves Floors/ gripping tray rail

Continuous shelves in height, depth and inclination adjustable. The three module widths and depths of 460 and 660 mm enable a Kanban system. Gripping tray rails for open fronted storage containers facilitate order picking.

Small parts

Small and compact, the transport trolleys present themselves from their manoeuvrable side. This supply trolley can be positioned at the workplace to supply material or to remove the finished parts.

Perforated back panel with hooks

Additional accessories include perforated rear panels for clear storage and provision of tools.

Workplace feeding systems from OTTOKIND

Pure ergonomics

Thanks to the module widths, the AZS can be easily moved into the optimum gripping areas of the workplace.

Even 300 x 400 mm containers can be stored in three lanes!

First in - First out

The roller conveyors accessible from the rear allow material to be fed in even during assembly.

Variable

The interlocking at the front and back allows the level to be individually subdivided in a simple way.

Transport and staging trolley

- Incl. base tray and 4 swivel castors - 2 lockable
- Max. load 300 kg
- Disassembled delivery, easy assembly

Type TB2

- Module width 1000 mm
- with 3 inclinable shelves - 1000 x 460 mm,
- 1 bottom tray,
- with 4 swivel castors, 2 lockable
- Load capacity 300 kg

Surface	Width mm	Depth mm	Height mm	No.
Standard	1030	740	1730	573620
ESD-conductive	1030	740	1730	E573620

Type TB3

- Module width 1250 mm
- with 3 inclinable shelves - 1250 x 460 mm,
- suitable for Euro containers
- 1 bottom tray,
- with 4 swivel castors, 2 lockable
- Load capacity 300 kg

Surface	Width mm	Depth mm	Height mm	No.
Standard	1280	740	1730	573640
ESD-conductive	1280	740	1730	E573640

Type TB4

- Module width 1250 mm
- with 3 inclinable shelves - 1210 x 615 mm,
- suitable for Euro containers,
- 1 bottom tray
- With 4 swivel castors, 2 lockable
- Load capacity 300 kg

Surface	Width mm	Depth mm	Height mm	No.
Standard	1280	740	1730	573660
ESD-conductive	1280	740	1730	E573660

Type TB5

- Module width 1000 mm
- with 6 slatted shelves depth 321 mm
- and 6 stop bars
- 1 bottom tray,
- with 4 swivel castors, 2 lockable
- Load capacity 300 kg

Surface	Width mm	Depth mm	Height mm	No.
Standard	1030	740	1730	573680
ESD-conductive	1030	740	1730	E573680

Type TB6

- Module width 1250 mm
- with 6 slatted shelves depth 321 mm
- and 6 stop bars
- 1 bottom tray,
- with 4 swivel castors, 2 lockable
- Load capacity 300 kg

Surface	Width mm	Depth mm	Height mm	No.
Standard	1280	740	1730	573700

Transport and staging trolleys with flow levels

- Movable transport system for industrial assembly, with inclined roller conveyors for automatic material feed by gravity
- Frame construction with welded side profiles and screwed-in connecting profiles
- 1 bottom tray for Euro crates
- 4 swivel castors, 2 of which can be locked, castor diameter 125 mm, tread grey
- Vertical profiles with 42 mm grid for plug-in installation of continuous levels or square-hole back panels
- Roller conveyors can be loaded from the rear
- Roller track levels can be individually subdivided by interlocking at the front and rear and adapted to different box widths
- Roller conveyor levels for material feed and empty crate discharge can be inclined to fit
- environmentally friendly powder coating

Transport and staging trolley, reinforced version

- To accommodate flow planes
- with 4 swivel castors, 2 lockable,
- incl. 1 base tray, D: 410 mm
- Load capacity 300 kg

Width mm	Depth mm	Height mm	No.
